Checklist

An accurate inventory and proof of ownership at the time of a loss can make claim settlement easier, faster, and less stressful. The inventory will take time to compile, but the time and frustration it may save you later will more than make up for it. This checklist will help you compile your home inventory. A good home inventory includes a detailed list of your possesions including receipts, descriptions, and photos of your homes contents. Please work with your insurance company to determine what is all needed, as this list is just a starting point.
